by  
Cork  
Supply

THE SHAPE OF EXCELLENCE.

# WHO WE ARE

Talis is part of Cork Supply, a producer and distributor of cork stoppers for the wine and spirits industry. Cork Supply was founded by Jochen Michalski in California in 1981, and has enjoyed four decades of growth, solidifying the company's leading position in the global cork closure market. Today the group has a production and/or sales presence in the major wine producing countries around the world.

Cork Supply belongs to the Harv 81 Group, together with Tonnellerie Ô — Premium French and American oak barrels, North America — and Studio Labels - Premium labels, Australia.

# HOW DO WE MAKE A DIFFERENCE?

Talis meets a longstanding market need:  
a premium, high performing bartop for luxury wines and spirits.

High quality top materials +  
high quality cork stoppers

In-house design and service:  
availability of unique and  
customized bartops

State-of-the-art  
R&D department

Sustainable  
operations

Most reliable partner:  
dedicated customer  
service team

Flexibility  
Timely deliveries

“ We understand that each customer has a unique story to tell, and we want to help them recreate it through their packaging. ”

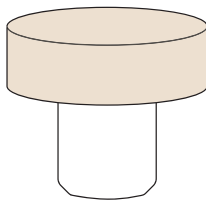

# CREATE THE PERFECT BARTOP IN 3 STEPS

The high quality materials used to produce the tops in conjunction with the rigorous selection of high quality cork stoppers, allows us to offer our customers a premium product with the best mechanical and sensory performance in the market.

top materials

## WOOD

Wood is one of the most noble materials used in spirits packaging. It's a porous and fibrous structural tissue, resulting in strength and durability. An organic material known for its versatility, workability, and aesthetic appeal, wood's unique grain patterns, textures, and colors make each bartop capsule truly one-of-a-kind.

### CUSTOMIZATION OPTIONS

#### **SHAPE**

standard (more competitive price and delivery time) | customized

#### **COLOR & FINISH**

natural | matte varnish | shiny varnish | lacquered (any color)

#### **TEXTURE**

different wood species | different treatments | wide range of textures

# PLASTIC

Plastic is considered one of the most versatile and flexible materials for bartop capsules. It can be molded into various shapes and sizes, allowing for unique customized solutions. It is one of the most common materials seen in bottle designs and can also be considered one of the most cost-effective solutions for bartop capsules.

## CUSTOMIZATION OPTIONS

### SHAPE

standard (more competitive price and delivery time) | customized (molds are required)

### COLOR & FINISH

matte | glossy | metallic | textured

### TEXTURE

smooth | polished | textured

## METAL

Metal is a durable and versatile material that is recommended for creating a premium and luxurious look and feel. Its versatility shines through with an extensive selection of colors and finishing options, offering a diverse array of aesthetic styles ranging from sleek and modern to timeless and elegant. Additionally, the metal weight exudes a sense of sophistication, adding a substantial and prestigious feel to bartop capsules.

### CUSTOMIZATION OPTIONS

#### **SHAPE**

standard | customized (specific tools required)

#### **COLOR & FINISH**

classic metallic shades (gold or silver) | unique hues (rose gold, bronze, etc.)

#### **TEXTURE**

smooth | polished | textured | rough

# GLASS

Made from the fusion of natural elements like sand or limestone at high temperatures, glass becomes a strikingly beautiful and versatile material. Seen as timeless, elegant, and delicate, it can add a level of sophistication to a spirits bottle.

## CUSTOMIZATION OPTIONS

### **SHAPE**

any shape by the use of specific tools

### **TEXTURE**

different levels of transparency

## CORK

Cork is Mother Nature's gift to us. It is a sustainable, renewable, and durable material that is harmlessly harvested from the bark of cork oak trees. It's composed of millions of tiny, air-filled cells that give it a unique combination of properties, including being lightweight, water-resistant, and compressible. Cork both gives a bottle a natural elegance and provides a visually appealing and tactile experience to consumers.

### CUSTOMIZATION OPTIONS

#### **SHAPE**

T-cork | conical | other formats

#### **COLOR**

natural tone | lighter shade

## BLOOM

The Bloom bartop capsule material is a combination of a biobased polymer and cork granules, which are a by-product of Cork Supply's cork production. Bloom stands for environmental and economical sustainability, combined with a unique, custom design. An economically viable solution for those concerned with the environmental footprint of their products and packaging.

### **MATERIAL COMPOSITION**

- 10 — 20% cork granules
- Bio-based polymer

### **CUSTOMIZATION OPTIONS**

- Aromas
- Colours
- Fluorescence

# CORK SHANK

Have you ever thought about the advantages of using a cork shank?

Be smart  
Use Cork

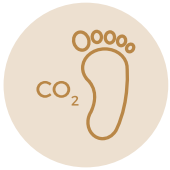

## **Cork is a natural and renewable material**

Cork shanks come from cork oak tree bark, which is harvested without harming the tree. This sustainable practice allows the bark to regenerate over about 9 years, maintaining a healthy forest and ecosystem.

## **Cork is recyclable**

It can be recycled, reused or decompose naturally without harming the environment.

## **Cork is part of the Bioeconomy**

The Bioeconomy refers to an economic system that uses renewable biological resources to make products, decreasing dependence on fossil fuels. Cork plays a crucial role in this system because of its renewability, carbon sequestration, biodiversity preservation, low environmental impact, alignment with circular economy principles, and versatile uses.

## **Cork promotes Circular Economy**

When using Talis cork shanks, you are promoting circular economy. 100% of the raw material purchased is valued for different cork products and energy creation.

**Myth Alert!** In the past, there were concerns about cork shanks potentially impacting the color of clear spirits. Talis has a specific surface treatment for cork shanks to prevent color migration.

## NATURAL

**Treatment for clear  
spirits available**

100% of our natural corks are processed by the InnoCork® and PureCork technologies.

DS100 service available:  
100% inspected lots
