The Growing Vinc Family

The Vinc family currently includes six different technical corks, with additional products in development:

VINC NEO

Higher oxygen ingress.
Fastest turnover wines.

VINC

Medium oxygen ingress.

VINC+

Lower oxygen ingress.

VINC NATURA

New biobased binder.
Lower oxygen ingress.

VINC RESERVE

Lowest oxygen ingress.
Extensive ageing wines.

VINC CUVÉE

Superior gas retention performance.

LENGTH x DIAMETER		38 / 44 x 24 mm	38 / 44 x 24 mm	38 / 44 / 47 / 49 x 24 mm	44 x 24 mm / 49 x 24,2 mm	47 / 49 x 24,2 mm	48 x 30,5 / 31 mm
OXYGEN INGRESS	TOI ⁽¹⁾	1,4 / 1,5 mg O ₂ @ 3 months	1,4 / 1,5 mg O ₂ @ 3 months	1,3 / 1,3 / 1,0 / 1,0 mg O ₂ @ 3 months	1,3 / 1,0 mg O ₂ @ 3 months	0,9 / 0,9 mg O ₂ @ 3 months	
		1,7 / 1,9 mg O ₂ @ 6 months	1,5 / 1,7 mg O ₂ @ 6 months	1,5 / 1,5 / 1,0 / 1,0 mg O ₂ @ 6 months	1,5 / 1,0 mg O ₂ @ 6 months	0,9 / 0,9 mg O ₂ @ 6 months	
	OTR ⁽²⁾	0,08 / 0,07 mg O ₂ / month	0,08 / 0,06 mg O ₂ / month	0,07 / 0,05 / 0,04 / 0,04 mg O ₂ / month	0,05 / 0,04 mg O ₂ / month	0,03 / 0,03 mg O ₂ / month	
		1,0 / 0,8 mg O ₂ / year	1,0 / 0,7 mg O ₂ / year	0,8 / 0,6 / 0,5 / 0,5 mg O ₂ / year	0,6 / 0,5 mg O ₂ / year	0,4 / 0,4 mg O ₂ / year

Quality from Forest to Bottle

The production of technical corks fits seamlessly with the company's philosophy of vertical integration from forest to bottle, and with their zero waste of raw materials goal:

- Cork Supply manufactures technical corks the **highest quality raw material**;

We control **100% of granule lots**;

- The granules are **analyzed and disinfected by batch***, providing the most effective and consistent treatment and ensuring that only the highest quality granules are used;

We perform the **largest amount of analysis** per lot in the industry;

- Chromatography and sensory analysis are performed at **6 different control points**;

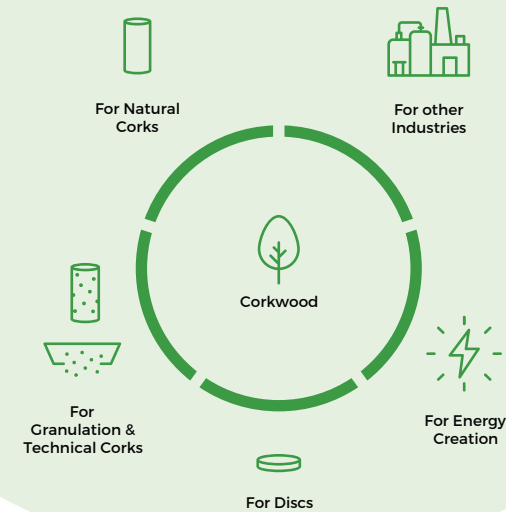

- A minimum of **300 individual cork soaks** are performed, allowing for individual TCA guarantees on the VINC products.

* **Vapex** is Cork Supply's disinfection process for granules that effectively extracts any potential TCA molecules and other volatile composites by using pressurized steam. The granules are analyzed and disinfected by batch, providing the most effective and consistent treatment and ensuring that only the cleanest quality granules are used to produce our technical corks.

Harvesting for the Future

Zero waste of raw materials. Promoting Circular Economy.

What makes a Vinc Closure Special?

100% controlled raw material

Bottle to bottle consistency

75% cork (weight) /
≥ 95% cork (volume)

Rebound and elastic properties

Individual TCA guarantee *

Negative Carbon Balance

Sensory neutrality

Investment in extensive quality control processes

HARV 81

G R O U P

In 1981 we founded Cork Supply, the first company of the Harv 81 Group in the US. In the decades that followed we opened Cork Supply operations in the leading wine markets of the world (Australia, South Africa, Portugal, Spain, France, Argentina, Italy and China) with the same commitment to excellence. Today we produce premium natural and technical corks for wine and spirits producers, and we work hard to redefine quality through innovation, superior service and expertise.

During these decades of growth, we diversified into other areas of business that also support wine and spirits producers.

In 2007, we entered the label market with the award-winning company Studio Labels in Australia. In 2008, we opened Tonnellerie Ô, a state-of-the-art coöperage to manufacture high quality barrels in the US.

Today, with our long-lasting expertise and deep commitment to quality, we can proudly say that we support the wine and spirits producers by providing consistent, reliable and premium solutions through these companies.

We are experts in Closures, Oak and Labels.

We are Harv 81 Group.
